hp e3000

internet  
security

With the advent of the Internet and the creation and rapid success of e-business, security has never been more important

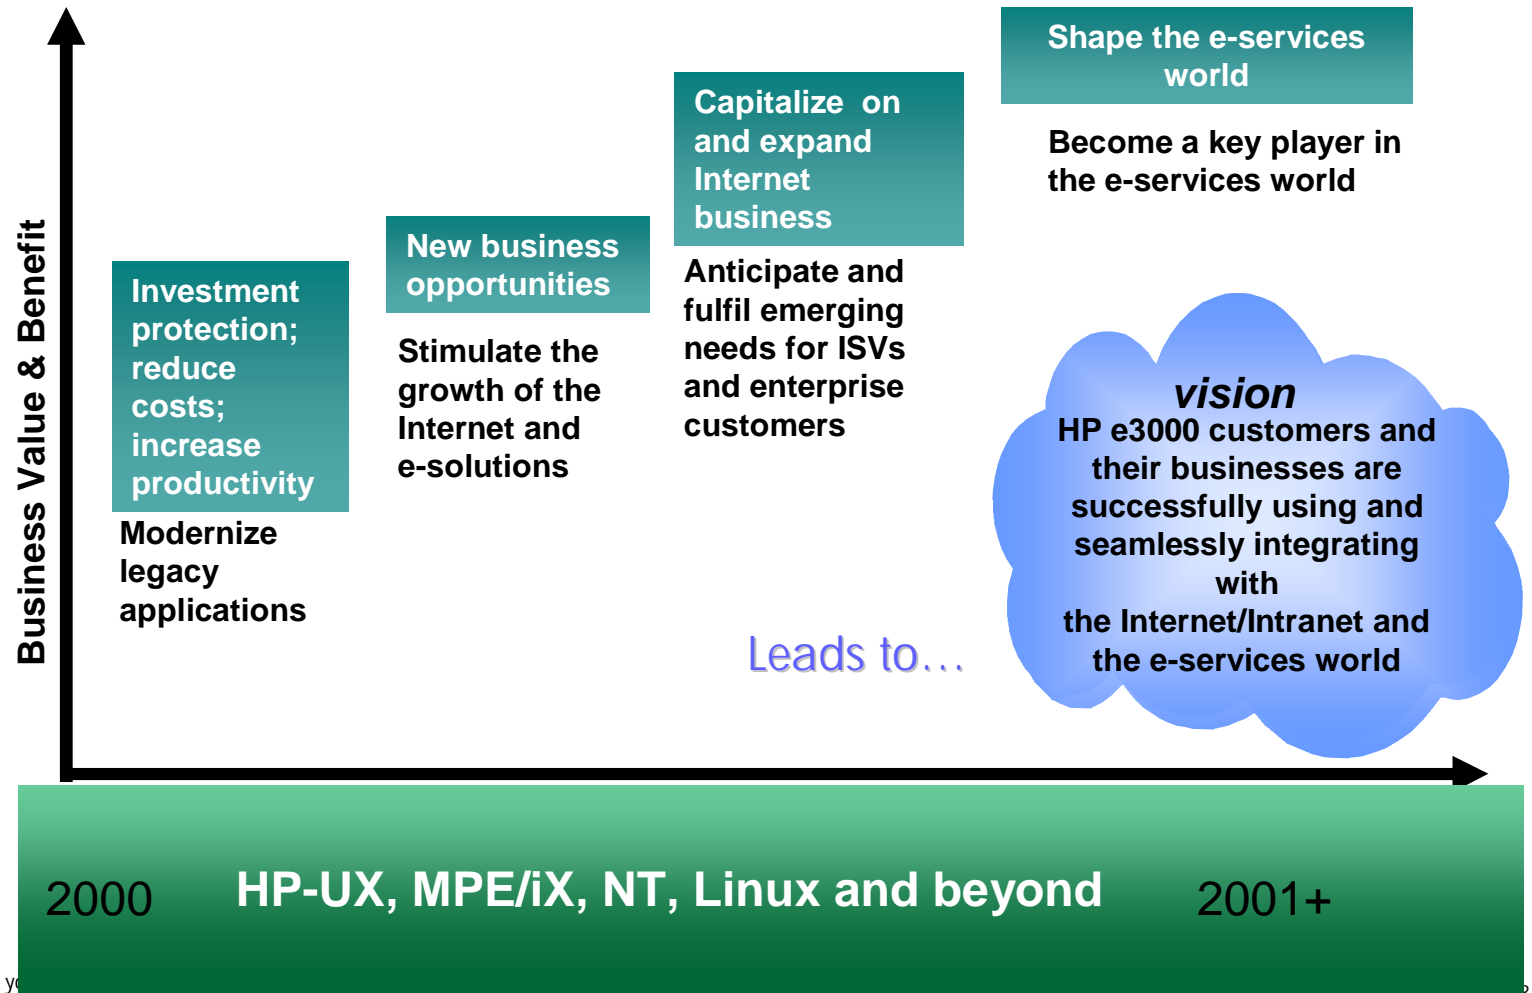

internet security on your hp e3000

hp e3000

# hp e3000 internet and interoperability roadmap

internet security

hp e3000

# Internet security vision

internet  
security

HP e3000 customers and their businesses are successfully using and seamlessly integrating the Internet and the e-services world...

**SECURELY, PRIVATELY (IF DESIRED), AND WITH TRUST.**

internet security on your hp e3000

hp e3000

# common internet security risks

internet security

- System Access
  - **Unauthorized access**
  - **Denial of service**
- Network communication
  - **Eavesdropping**
  - **Tampering**
  - **Impersonation**
  - **Repudiation**

hp e3000

# internet security key objectives

internet security

- Provide robust host security and ensure system integrity while connected to the Internet
- Provide the ability to guarantee the privacy and integrity of data exchanged over the Internet

hp e3000

# internet security strategy

internet  
security

## Focus on KEY Internet security areas

- Leverage existing security products and services (firewalls, VPN gateways) running on UNIX and NT
- Provide robust system security
- Embrace key Internet building blocks
- Provide key security Internet services
- Strong partnership with ISV to provide additional Internet security products and solutions
- Continue research and evolve

internet security on your hp e3000

hp e3000

# hp e3000 internet security in general

internet  
security

- Access control

**Protect internet connected systems against unwanted access**

- **Perimeter defense**
- **System host security**

- Secure communication

**Ensure privacy and integrity of data transmitted over the network and protect against eavesdropping, tampering and forgery**

- **RSA BSAFE SSL-C toolkit**
- **HP WebWise MPE/iX Secure Web Server**
- **HP Secure Web Console**

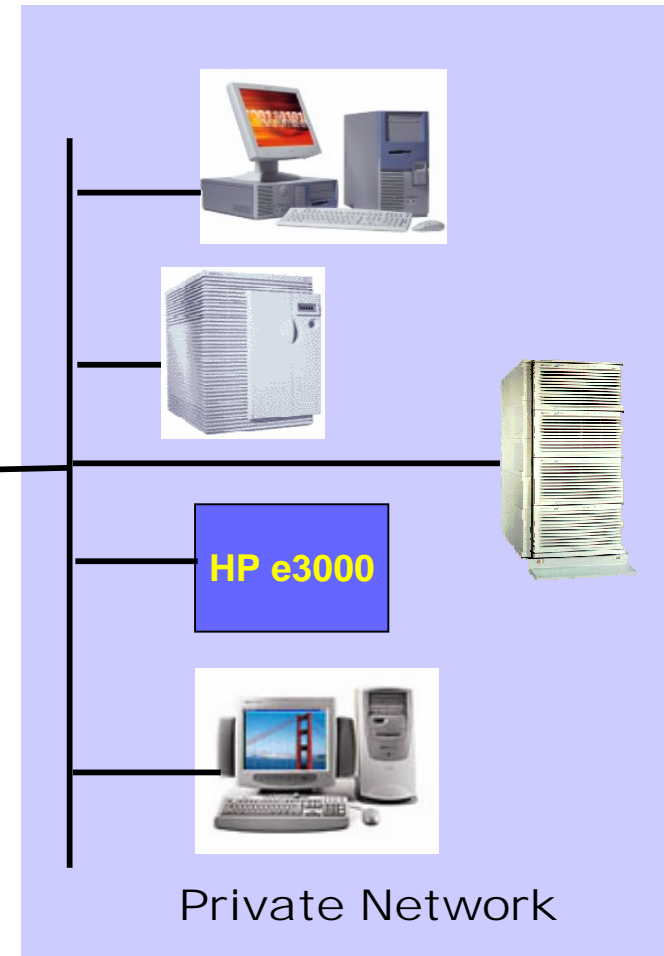

hp e3000

# perimeter defense: firewalls

internet  
security

internet security on your hp e3000

hp e3000

# system host security

internet  
security

- Physical security
- Basic OS security measures
- 3rd party security products

hp e3000

# system host security

## basic os security measures

internet  
security

- Logon
  - **unique logon ID, user.account + password**
  - **logon UDC**
- System access
  - **Account structure (accounts, groups, users, files)**
  - **User identity, user roles, capabilities (SM, AM, OP, PM, etc.) determine access level**
- File access
  - **File access mode, permissions, and lockwords**
  - **ACD (Access Control Definition)**

hp e3000

# system host security

## basic os security measures

internet  
security

- Logging facilities
  - **System logging**
  - **User logging**

- Internet services
  - **INETDCNF.NET.SYS or /etc/inetd.conf**
  - **INETDSEC.NET.SYS or /usr/adm/inetd.sec**
- HP security monitor

internet security on your hp e3000

hp e3000

# hp e3000 security partner products

internet security

- SAFE/3000
  - **Monterey Software**
  - <http://www.editcorp.com/business/montereysoftware>
- Security/3000 and Audit/3000
  - **VESOFT**
  - <http://www.vesoft.org>

hp e3000

internet  
security

# Secure Communication

- Data Privacy
  - **Ensure no one else has access to data**
- Data Integrity
  - **Prevent data tampering**
- Authentication
  - **Confirm the sender's and receiver's identity**
- Authorization
  - **Grant or deny access or services to a particular user**
- Non-repudiation
  - **Prevents the sender of information from denying at a later date that the information was ever sent**

internet security on your hp e3000

hp e3000

# key internet building block secure sockets layer (SSL)

internet  
security

- An Internet protocol designed to provide secure communication between a client and a server via encryption, message digests, digital signatures, and certificate authentication
- De facto standard for securing data flowing across the Internet

hp e3000

# encryption

internet  
security

- Encryption is a process of scrambling data into an unintelligible form (cipher text) by applying a cryptographic algorithm
- Decryption converts the cipher back to its original form
- Require key(s) with the algorithm to produce an encrypted result or to decrypt previously encrypted
- The strength of the encryption is dependent on:
  - **the nature of the algorithm**
  - **the size of the keys (40 bits? 56 bits? 128 bits? 1024 bits? )**
- Address the problem of eavesdropping

internet security on your hp e3000

hp e3000

# secret key cryptography

internet security

- A single key is used for both encryption and decryption
- The key is "shared" by the sender and receiver
- Common symmetric algorithms are RC4, DES and 3-DES

hp e3000

# public key cryptography

internet security

- Two keys are used. The two keys provide inverse functions.
  - **Private - Known only to the owner of the key**
    - create digital signatures
    - create digital certificates
  - **Public - Exposed to the world**
    - included in digital certificate
- Most well known public/private key algorithm is RSA

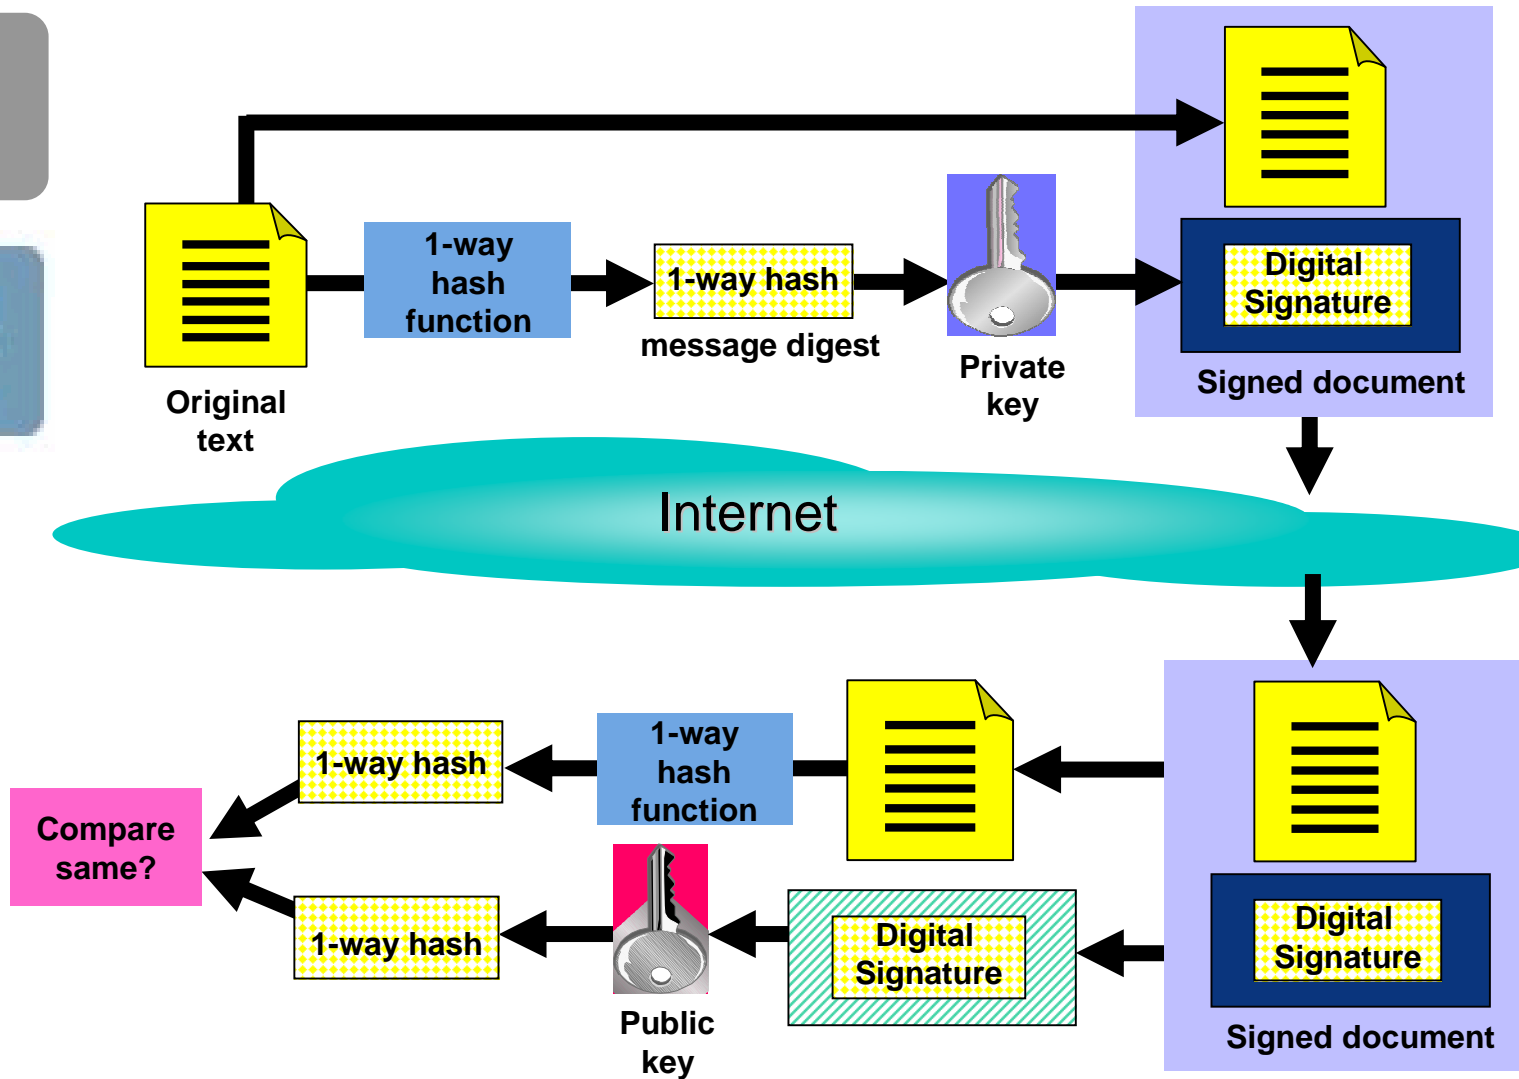

hp e3000

internet security

# message digests and digital signatures

hp e3000

# digital certificates

internet  
security

- A digital document created and signed by Certificate Authority
- Validates certificate holder's identity and the public key to others
- Format defined by X.509 standard

**Certificate holder's  
identity (name,  
company & etc.)**

**Public key**

**Serial number**

**Expiration date**

**The identity and  
signature of a trusted  
Certificate Authority**

hp e3000

# RSA BSAFE SSL-C toolkit overview

internet  
security

- What is it?
  - **A software development suite for building SSL-enabled applications, combined with full suite of RSA algorithms**
  - **Enable developers to easily embed SSL-based encryption capabilities into their applications**
- RSA BSAFE SSL-C v.1.0 key features
  - **SSL v2, v3, and TLS v1 compliance**
  - **128-bit encryption**
  - **X.509 authentication**
  - **Session caching**

hp e3000

# RSA BSAFE SSL-C toolkit continued...

internet security

- Includes
  - **SSL Library with C APIs**
  - **Sample programs and source code**
  - **Utility for key generation, certificate management**
- Availability
  - **HP distribution**
    - Available for downloading from Jazz **“free”**
    - For **development and testing purpose only**
    - **No support from HP**
    - **Requires user license** from RSA for support and deploying applications that use BSAFE SSL-C toolkit
  - **Contact RSA directly**

# HP WebWise. Overview

internet  
security

- A new Internet suite of key offerings for e-business and web-enabling your HP e3000
- First suite component is the HP WebWise MPE/iX Secure Web Server based on open-source Apache
  - **Orderable and shipping now and available for MPE/iX 6.0 OS or greater.**
  - **On-line order, purchase, and download available in the near future from HP Software Depot**
  - **Full HP support via the Response Center**
  - **Price ranges from US \$1295 to US \$1995 based on system performance tiers**
- Future offerings may include services such as web-consulting/training and third party products for easy, quick and affordable development and deployment

internet security on your hp e3000

hp e3000

# HP WebWise. secure web server key features & benefits

internet security

- Supports SSL and TLS
  - **Full-strength encryption**
  - **Client and server X.509 authentication**
  - **Allows customers to build internet applications with e-confidence!**
- Supports Dynamic Shared Objects (DSO)
  - **Apache modules dynamically loaded from external NMXLs**
  - **Allows customers to add-on extra functionality**
  - **Significant performance improvement over CGI**

# hp's secure web console

internet security

- Now, manage your servers over your intranet
  - **From any location in the world**
  - **From any browser** (Netscape or Microsoft IE)
- Remote browser access to the server console port (access to powerful, low level console commands)
- One person, one "console", several servers
  - **"Bookmark" the servers**
  - **Manage from the comfort of your office**

hp e3000

# some security tips

internet  
security

- Use a firewall
- Put your sensitive data behind the firewall
- Disable unneeded in-bound network services
- Make sure remaining services are configured properly
- Activate logging facility and regularly examine the logs to detect intrusion attempts
- Stay current on releases & patches

hp e3000

## some security tips continued...

internet  
security

- Properly configured all subsystems not to allow unintentional access points
  - **Restrict file system access by using file access mode, permissions, lockwords and ACDs**
  - **Regularly change all accounts, group and/or users passwords**
  - **Limit the number of login accounts on the server**
- Use HP WebWise. secure web server for secure communication
- Web server security tips

**please go to HP WebWise. secure web server tutorial**

hp e3000

# Continue to monitor and evolve...

internet security

- Evaluate and strengthen the OS system security
- Explore key security enabling technologies
  - **secure protocols**
  - **PKI, VPN, IPSec and etc.**
- Explore key security services and products

hp e3000
